

MAPPING OF FUNCTIONAL REQUIREMENTS AND TERMINOLOGY

The National Archives (previously the Public Record Office) Requirements 1999 and 2002, with MoReq and US DoD 5015.2 Standard Requirements 2002 & 2007

This appendix contains information which relates the Requirements for Electronic Records Management systems 1999 and 2002 to corresponding requirements of MoReq and the US DoD 505.2 Standard Requirements 2002 and 2007. It includes tables that relate requirements, followed by one that maps the terminology used in the different publications. Where a requirement number is shown in parentheses, the relationship is approximate and / or partial (e.g. where the TNA functional requirement covers classes and folders but the corresponding requirement covers folders only).

Some of those requirements concerning standards, be they non-functional and / or optional (i.e. requirements numbered A.9.11 and those in sections B.1 onwards) are not mapped. Finally, the US DoD requirements dealing with security (Chapter 4, Management of Classified Records) are not mapped, as they are specific to US military standards.

Where applicable symbols have been used to indicate whether or not a TNA requirement is "Desirable" or "Highly Desirable". Where Applicable this has also been applied to the other standard's requirements.

Note: The symbols used for non-TNA standards is only indicative and may be subject to change by the publisher.

Symbols key

- ** Highly Desirable (TNA 2002) ^ Desirable (TNA 1999)
 * Desirable (TNA 2002) ÷ Desirable (MoReq), Non-Mandatory (5015.2)

MAPPING OF TNA REQUIREMENTS TO MOREQ AND DOD
